

November 13, 2023

Brighton Technologies, LLC
4914 Gray Rd
Cincinnati, OH 45232-1513
United States

To Whom It May Concern:

In October of 2023, pursuant to our agreement with Brighton Technologies LLC, the Freefly Security assessment team conducted a network and application penetration testing of the BConnect application and supporting services and infrastructure.

The assessment objective was to identify, within the designated time and scope, any security issues in the main portal Web application, REST API, mobile applications, and cloud-based servers. The assessment team combined automated network and application vulnerability scanning tools with manual penetration testing techniques in order to rapidly locate attack vectors and simulate real-world exploitation.

Brighton Technologies has been provided the detailed findings and recommendations resulting from the assessment in a summary assessment report. As of November 13, 2023, Freefly Security confirms that Brighton Technologies has properly remediated all identified issues and findings.

Sincerely,

Brian Soby
